

MPC
Therapeutics

Targeting mitochondria to improve cell therapies

Augustin de Bettignies, PhD, MBA
Chief Commercial Officer

June 2023

Company highlights

Mission

- We are a biotechnology company focused on **stem cell regeneration** to improve the performance of **cell therapies** and treat **degenerative pathologies**.

Assets & IP

- First-in-class **small molecule** inhibitors of the **Mitochondrial Pyruvate Carrier (MPC)**
- **Composition of matter PCT** filed in August 2022 + other licenses in mitochondrial targets

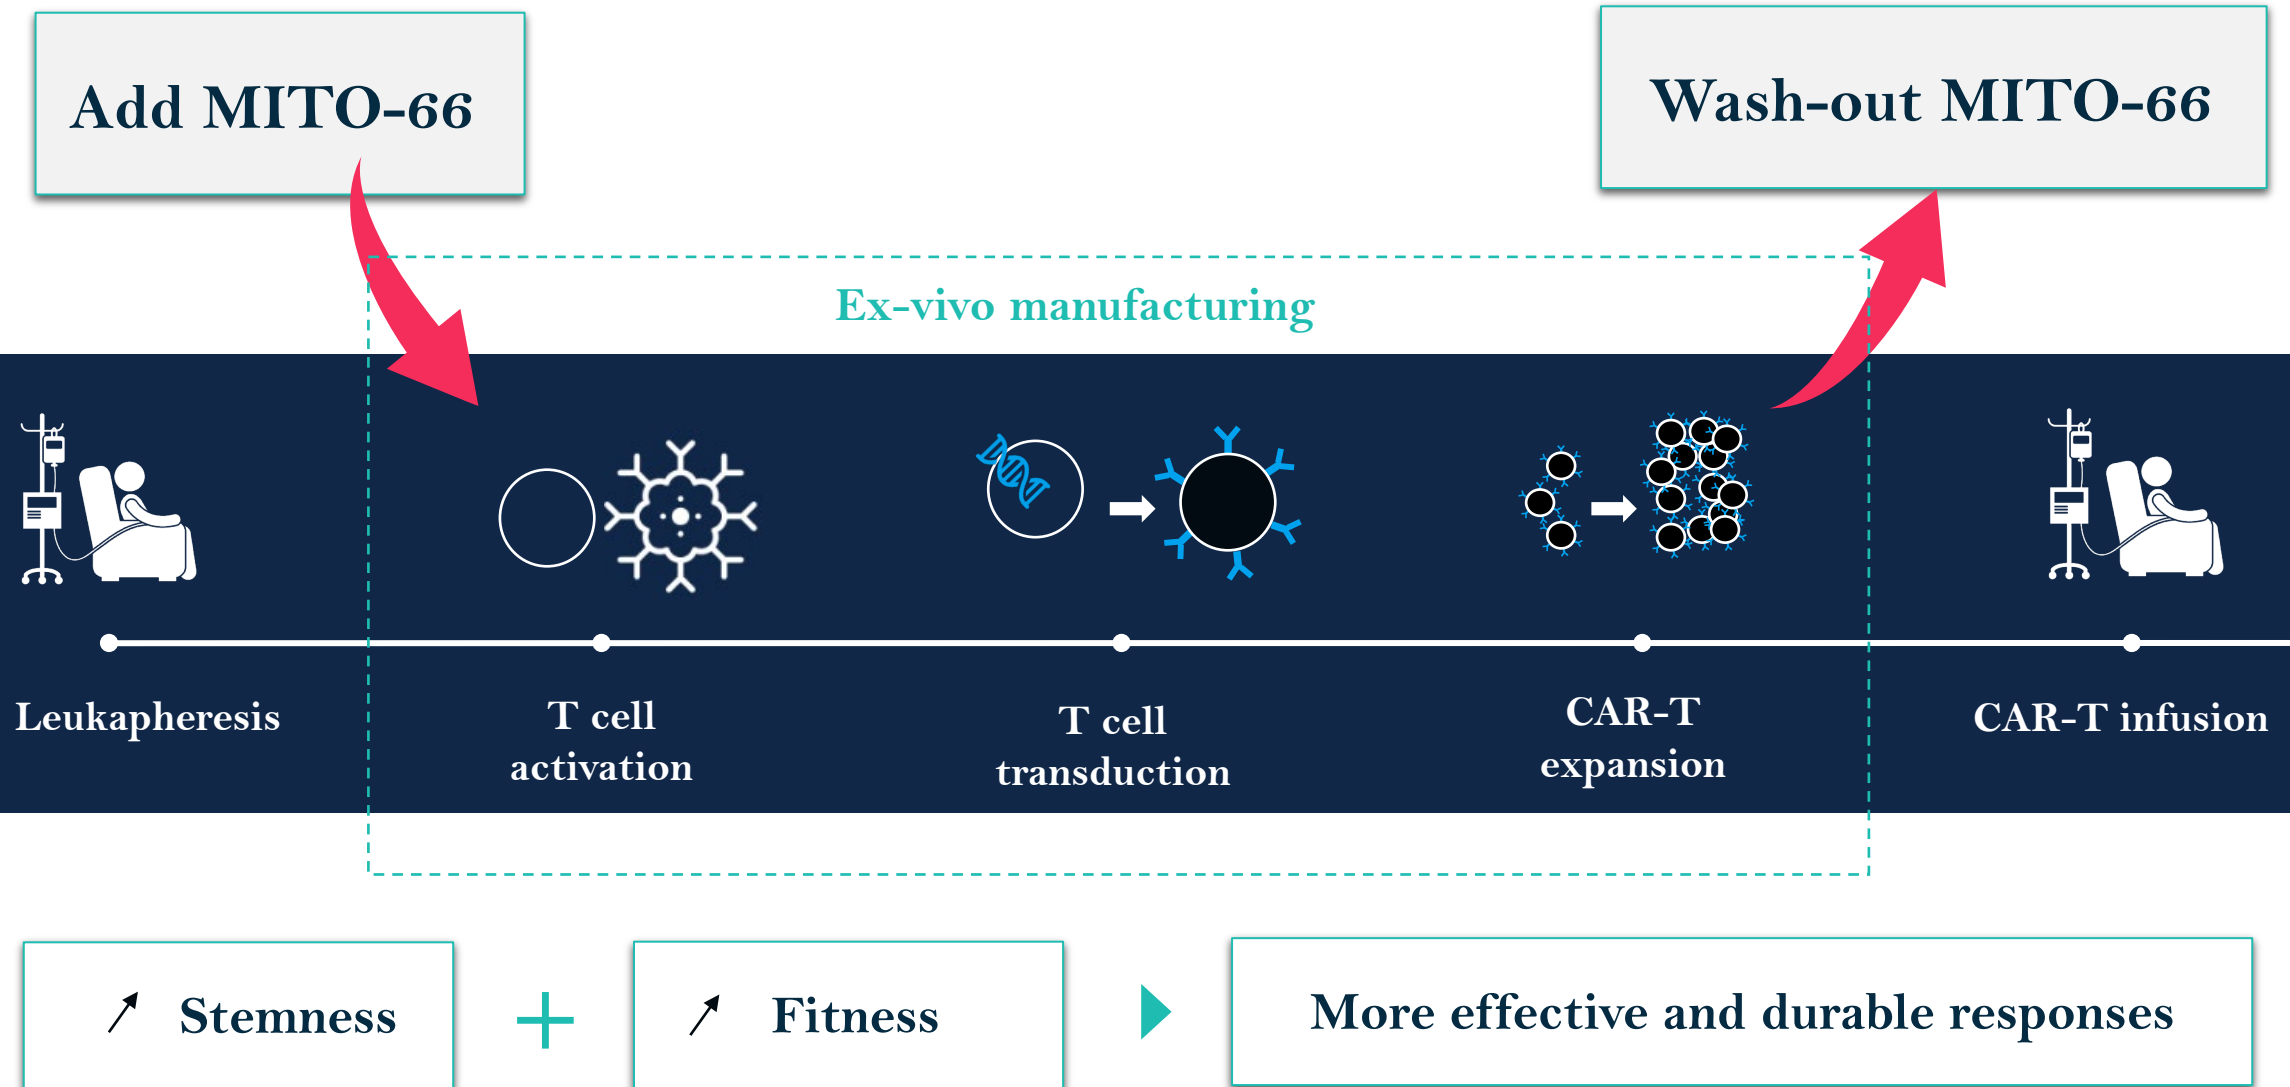

Potential

- **Short-term revenue opportunities** as processing adjuvants to T cell therapies against cancer
- **Potential for expansion** into Hematopoietic Stem Cells, and Alzheimer's disease

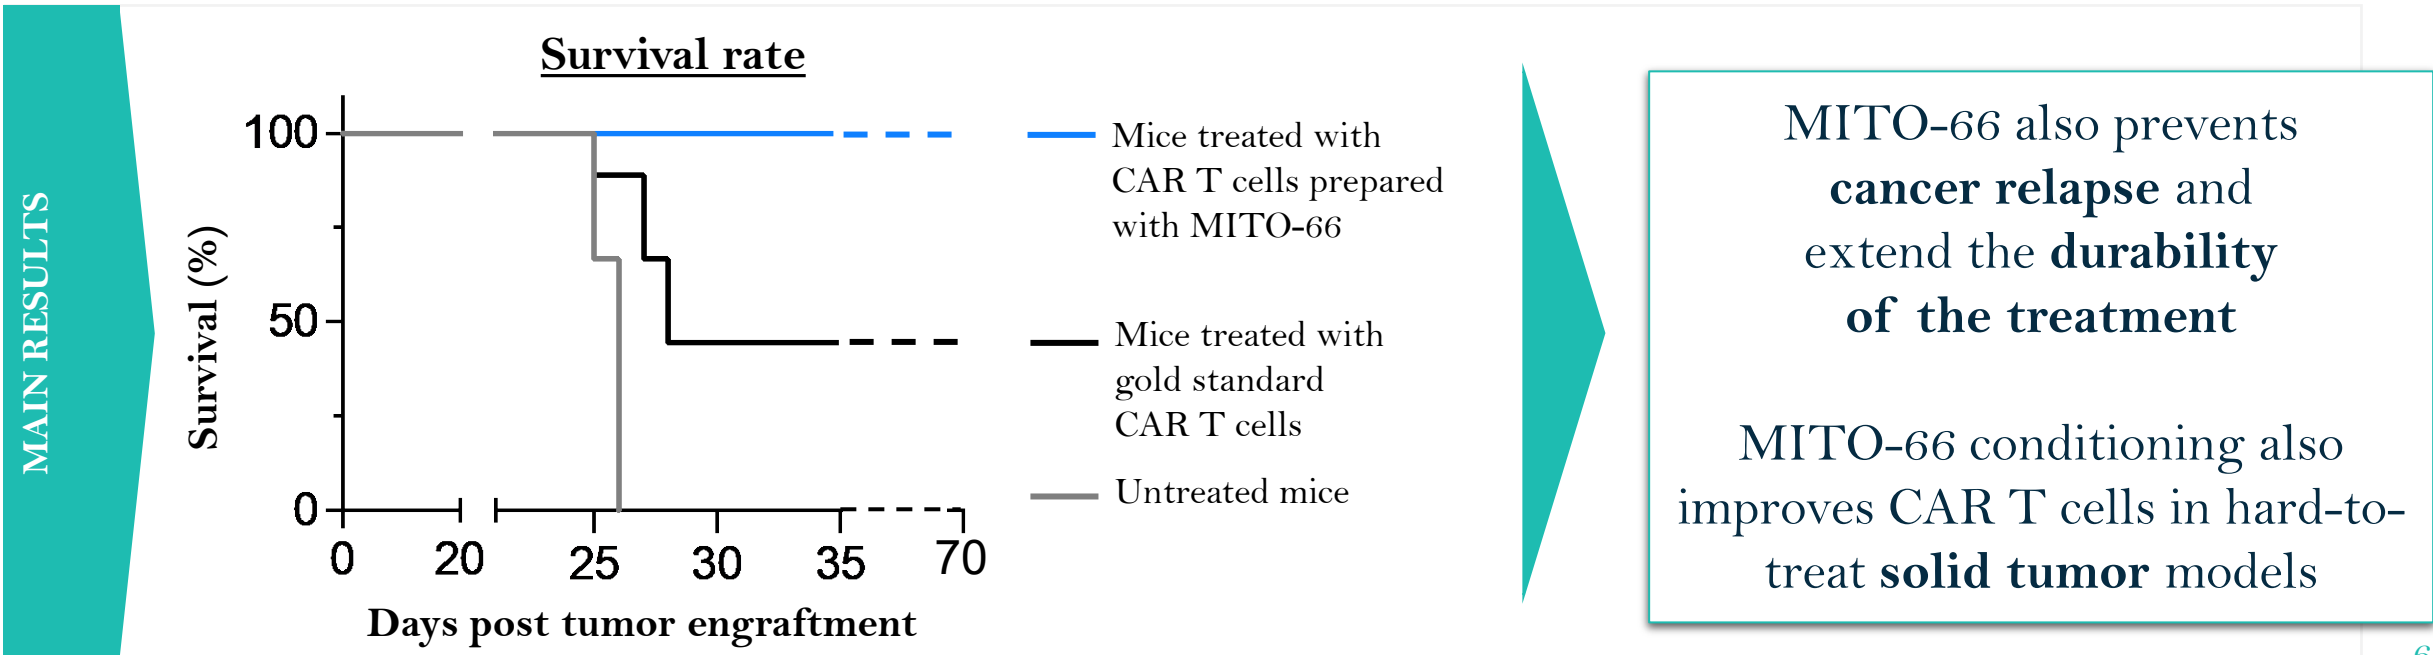

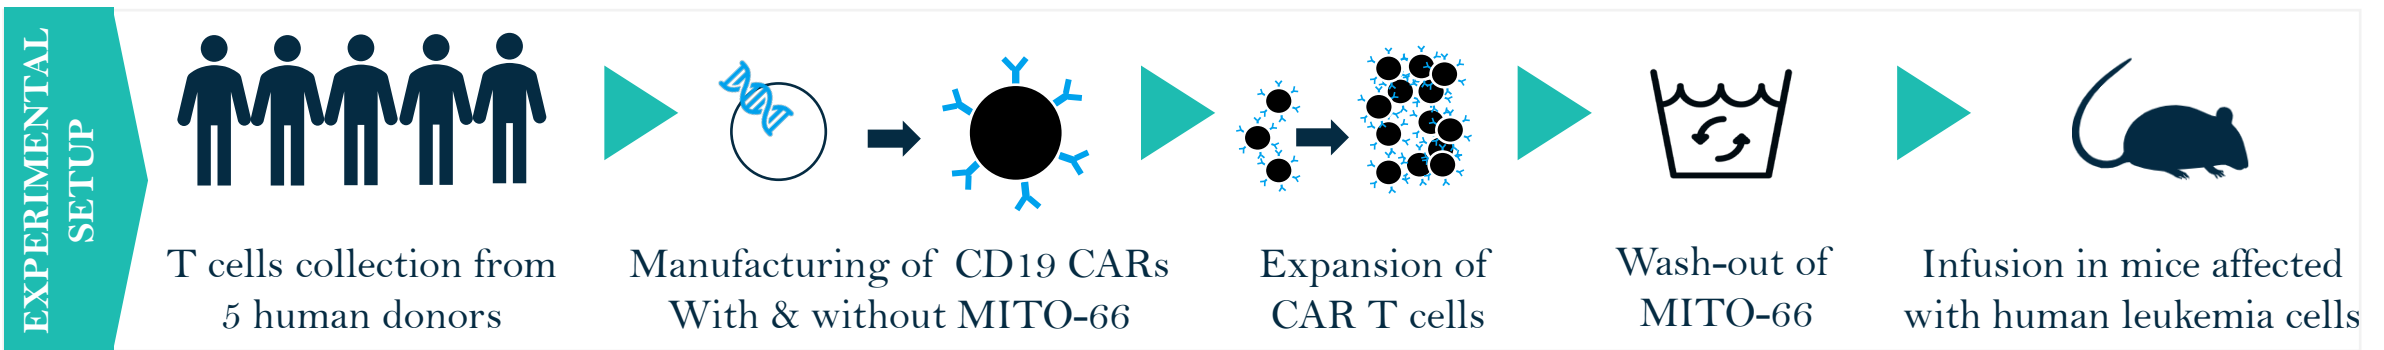

Origin & Fundraising

- **University of Geneva**  spin-off in 2018
- **Raise CHF2.6M** non-dilutive + **Pre-seed** funding to get our lead compounds into the clinic and obtain preclinical POC in other indications

MITO-66 is used during the ex vivo manufacturing of CAR T therapies

MITO-66 conditioning makes human CAR T cells 100% successful in treating leukemic mice

Several partners are actively testing MITO-66 in their preclinical models

Discovery MTA

Partners can test small amount of MITO-66 at no cost under a MTA.

March - August 2023

Non-regulatory preclinical Collaborative research agreement

We charge the supply & preclinical license of MITO-66

September 2023 – Spring 2024

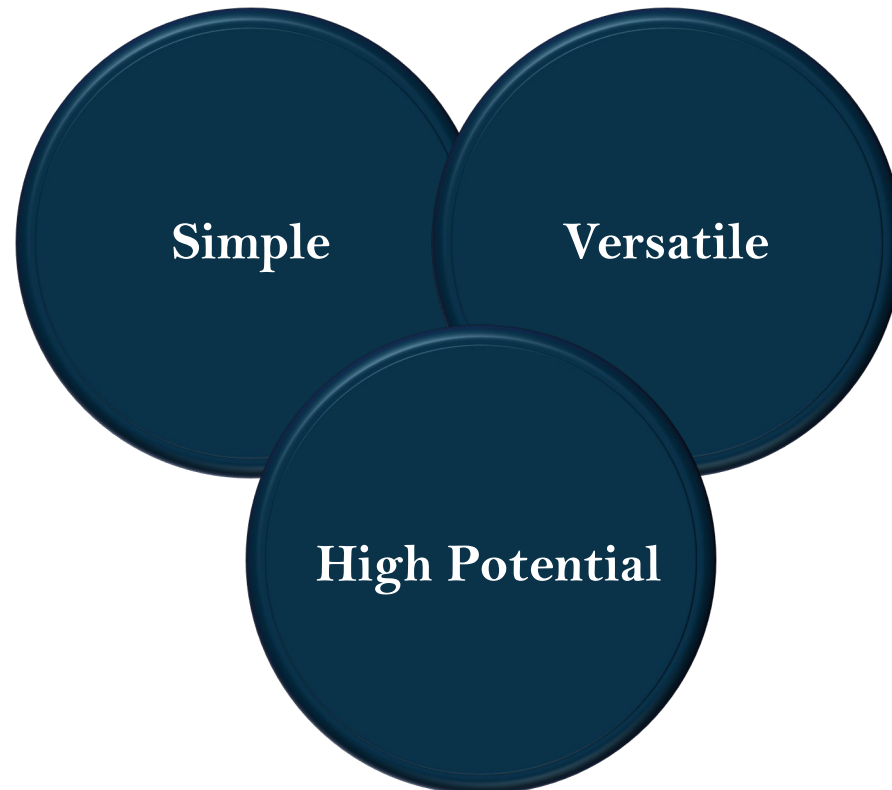

Clinical & Commercial Licenses

MITO-66 licensed to be used in cell therapy products

Q4 2024

MPC Therapeutics : a unique partnering & investment opportunity

Increase the **efficiency & durability** of CAR T-cells...

... Tap-in to growing **rejuvenation, cell therapy & stem cell** markets with an innovative **metabolic approach**
